

# Training on the adapted Governance Regulation – Integrated Policies and Measures

*Chisnau, Ministry of Energy*

22-23<sup>rd</sup> September 2025, Chisinau, Moldova  
In-person training for the adapted Governance Regulation

European Environment Agency

# SESSION OUTLINE

What to report on integrated PaMs?

How to report on integrated PaMs?

2023 Reporting, Tools and QC

- Practical exercise – filling in the report template with NECP data

Q and A

National Systems reporting obligation

# Reporting on Integrated Policies and Measures

# What to report on Integrated PaMs?

## Article 18 (1)(a) – Integrated reporting on greenhouse gas policies and measures

By 15 March 2023 and every second year thereafter, CPs shall report to the Energy Community Secretariat their integrated policies and measures (PaMs) as per the dimensions of the Energy Union.

**Decarbonization**

**Energy Efficiency**

**Energy Security**

**Energy Markets**

**Energy Research**

Information reported describing the nature of the PaM, including type, sectorial focus, and estimated greenhouse gas reductions, as well as estimated costs and benefits.

Reports due:

15 March – Biannually – Since 2023

# What to report on Integrated PaMs?

## First in Reportnet: Key characteristics and progress – Common for all PaMs

### What to report?

#### Table 1: Sectors, gases, and type.

Descriptive information  
Indicators, objectives, gases  
Links with long-term strategy,  
NDC, other policies

#### Table 2: Available results of ex-ante and ex-post assessments.

GHG emission reductions  
Methodological descriptions

#### Table 3: Available projected and realised costs and benefits

Realized and projected costs  
and benefits  
Methodological descriptions

#### Source:

Annex 24 from the 1<sup>st</sup> Implementing act (2020/1208), Annex 9 from the 2<sup>nd</sup>, (2022/2299)

## 2<sup>nd</sup> step – depends on the PaMs Dimension.

Always first fill in the first page, and then 2<sup>nd</sup> step:

### Decarbonization

- Annex 13 and 14.
- If a Renewable Energy PaM, then Annex 9, table 2 and 4 too.

### Energy Efficiency

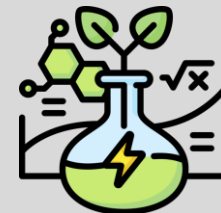

- Annex 9, table 3 and 5.
- If a new policy, then annex 10 too.
- If regarding energy savings, then annex 9, table 3 and 5, and annex 11.
- If regarding public buildings, then annex 9, table 3 and 5, and annex 12.

### Energy Security

### Energy Markets

### Energy Research

- If these three, then just annex 9 (first page, and then annex 13 and 14).

# Pre-loading

If you have submitted your 2023 GHG PaMs data, you will be able to pre-load your 2025 dataflow with the 2023 data.

The same applies in 2027.

→ “Only” necessary to update on the GHG PaMs, and complement with the remaining dimensions.

This does not work on pre-filled dataflows – the data needs to be submitted for pre-loading to work.

2023 dataflow is still open....

# Policies and Measures (PaMs) Export Tool

## What is it ?

Exports Policies and Measures data from Reportnet 3 so it can be imported into UNFCCC Reporting Tool.

## When is this relevant?

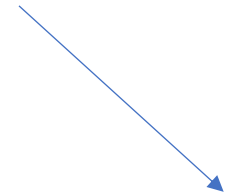

When you have reported data on PaMs in Reportnet, this extracts the available relevant data for UNFCCC and fills this.

## Note

Only Reported data can be exported

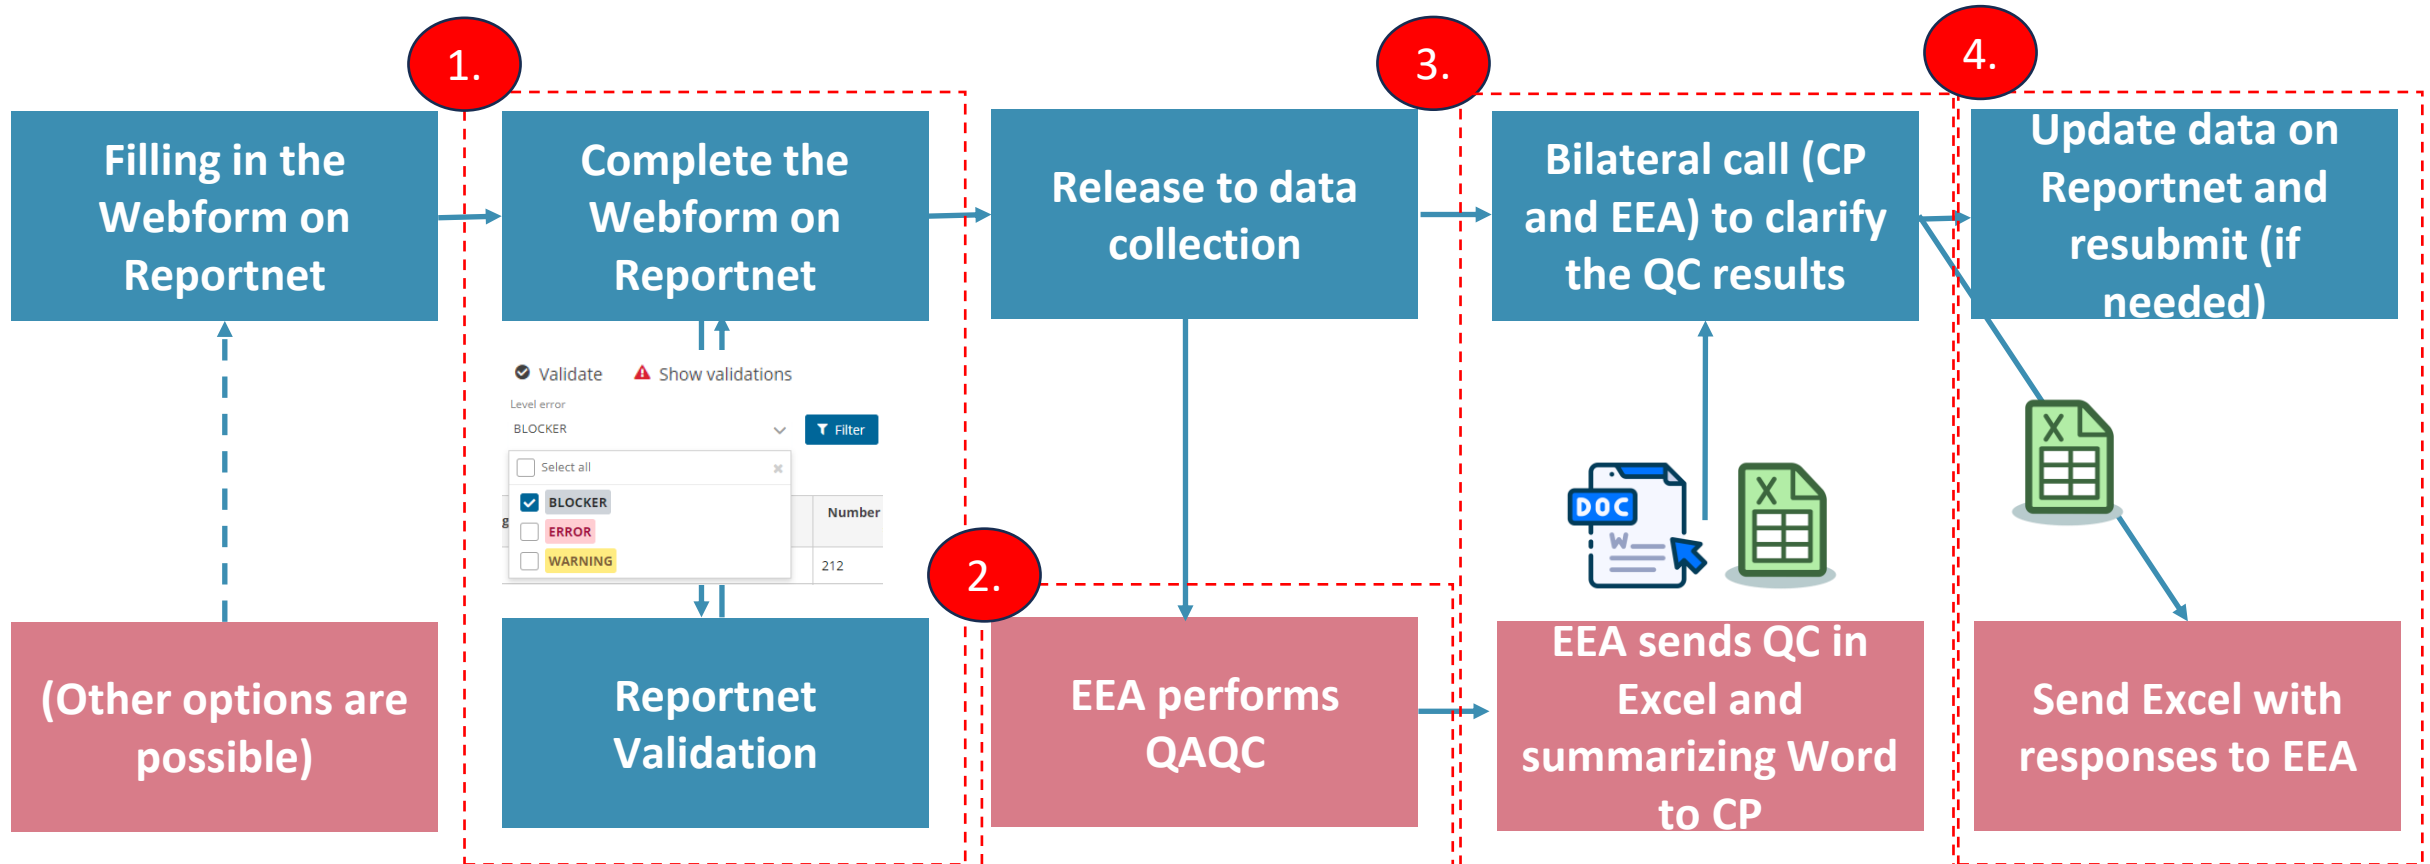

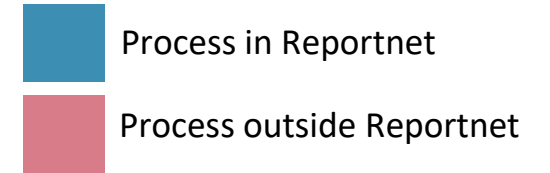

The user need access to Reportnet3 & UNFCCC Reporting Tool

For questions regarding this, please contact Marc Ridler at [Marc-Etienne.Ridler@eea.europa.eu](mailto:Marc-Etienne.Ridler@eea.europa.eu).

# Quality control for PaMs

## Legend

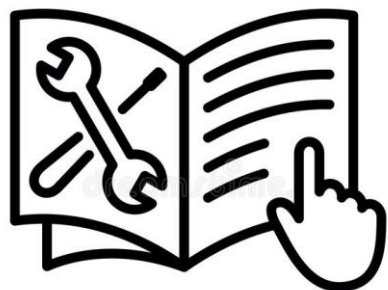

# Lessons learnt from the first rounds of PaMs reporting

- Consistency between reported information is key
  - Implementation period and implementation status. E.g. the status is set as “implemented” by the start year is in the future.
  - Implementation status and projection inclusion.

Implementation status	Projection scenario
Adopted	WEM
Implemented	WEM
Planned	WAM
Expired	WEM

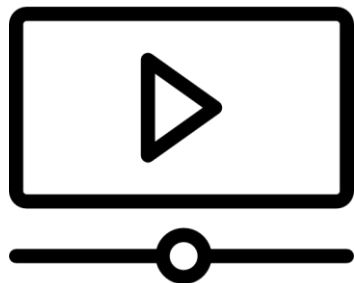

# Available support for PaMs

forum

Teams forum where you can post  
questions and exchange with  
other reporters.

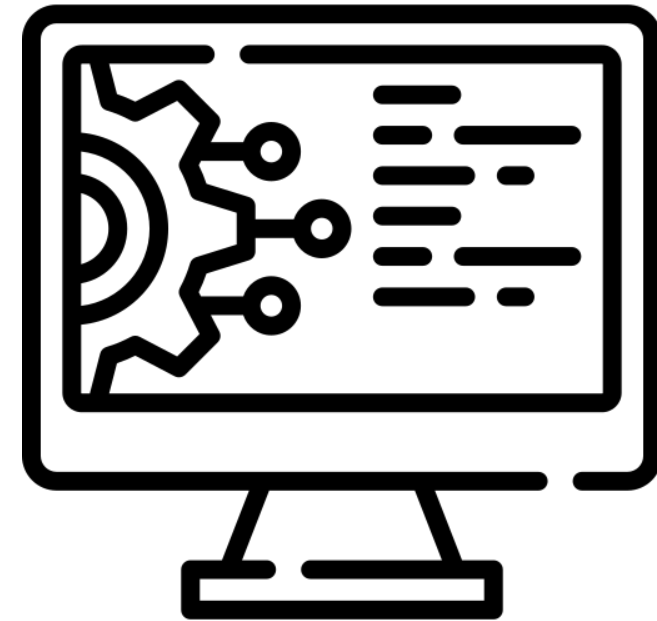

# How to report on Integrated PaMs?

On Reportnet 3, EEAs reporting software.

In general, one has to be assigned as a lead or supporting reporter to see the dataflow.

However, we have created a test dataflow for this training that you all should have access to.

We will now visit it together!

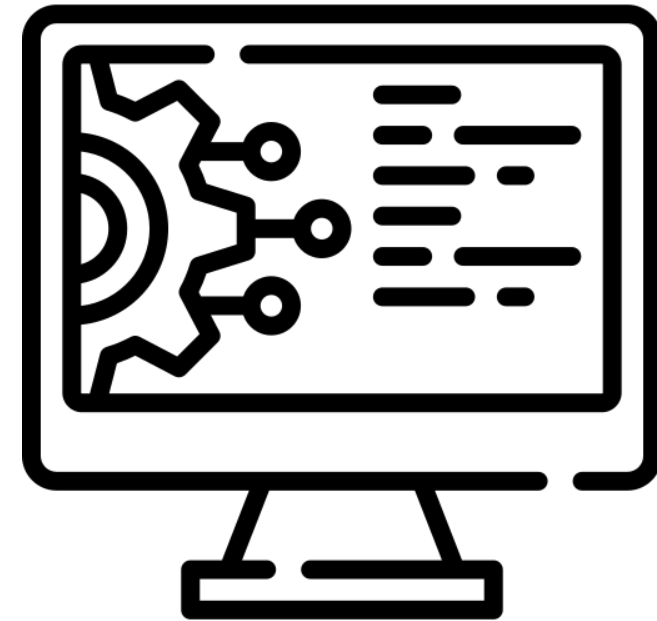

# Exercise – filling in a PaM in the Integrated template

On Reportnet 3, please visit the following dataflow:

## **TRAINING - Energy Community: Integrated national policies and measures**

Please choose a PaM you are familiar with from your NECP, and try and fill it in.

Please note down any questions or doubts, and we will address them together at the end of the session.

# Reporting on National Systems for Policies and Measures and Projections

# National Systems for PaMs and Projections

## Article 39 – National system for policies and measures and projections

By 15 March 2023 and every second year thereafter, CPs shall report to the Energy Community Secretariat on their national system for policies and measures and projections.

This means that they should describe how their system for preparing and approving reports on policies and measures as well as projections is set up. This includes their institutional, legal and administrative arrangements, as well as how it relates to other systems such as the GHG Inventory or National Determined Contributions.

<u>Reports due:</u>	15 March – Biannually – Since 2023
---------------------	------------------------------------

### Examples of MS reporting:

#### Croatia's reporting

#### Bulgaria's reporting

#### Estonia's reporting

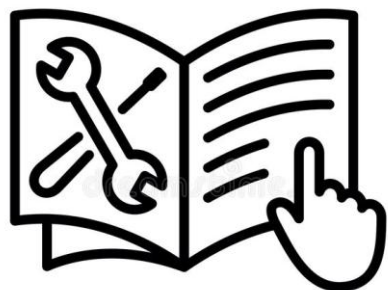

Source: <https://climate-energy.eea.europa.eu/topics/climate-change-mitigation/national-systems/data>

# National Systems for PaMs and Projections

1. Name and contact information for the **entities with overall responsibility** for the National System for policies and measures and projections
2. **Institutional arrangements** in place for preparation of reports on policies and measures and of projections as well as for reporting on them, including an organogram
3. **Legal arrangements** in place for preparation of reports on policies and measures and of projections
4. **Procedural and administrative arrangements** and timescales in place for the preparation of reports on policies and measures and of projections, to ensure the timeliness, transparency, accuracy, consistency, comparability and completeness of the information reported
5. Description of the **information collection process**
6. Description of the alignment with the **national inventory system**
7. Description of the links to arrangements on **integrated national energy and climate reports** pursuant to Art. 17 of the adapted Regulation (EU) 2018/1999
8. Description of the **quality assurance and quality control activities** for reporting of policies and measures and projections
9. Description of the **process for selecting assumptions, methodologies and models** for making projections of anthropogenic greenhouse gas emissions
10. Description of procedures for the **official consideration and approval** of the Contracting Parties national system for policies and measures and projections
11. Information on relevant institutional administrative and procedural arrangements for **implementation of the nationally determined contribution**, or changes to such arrangements
12. Description of the **stakeholder engagement** undertaken in relation to the preparation of policies and measures and projections

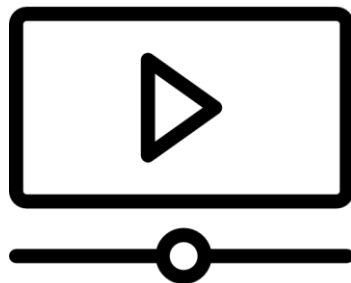

# Available support for National Systems
