

Training on reporting obligations for the adapted Gov Regulation

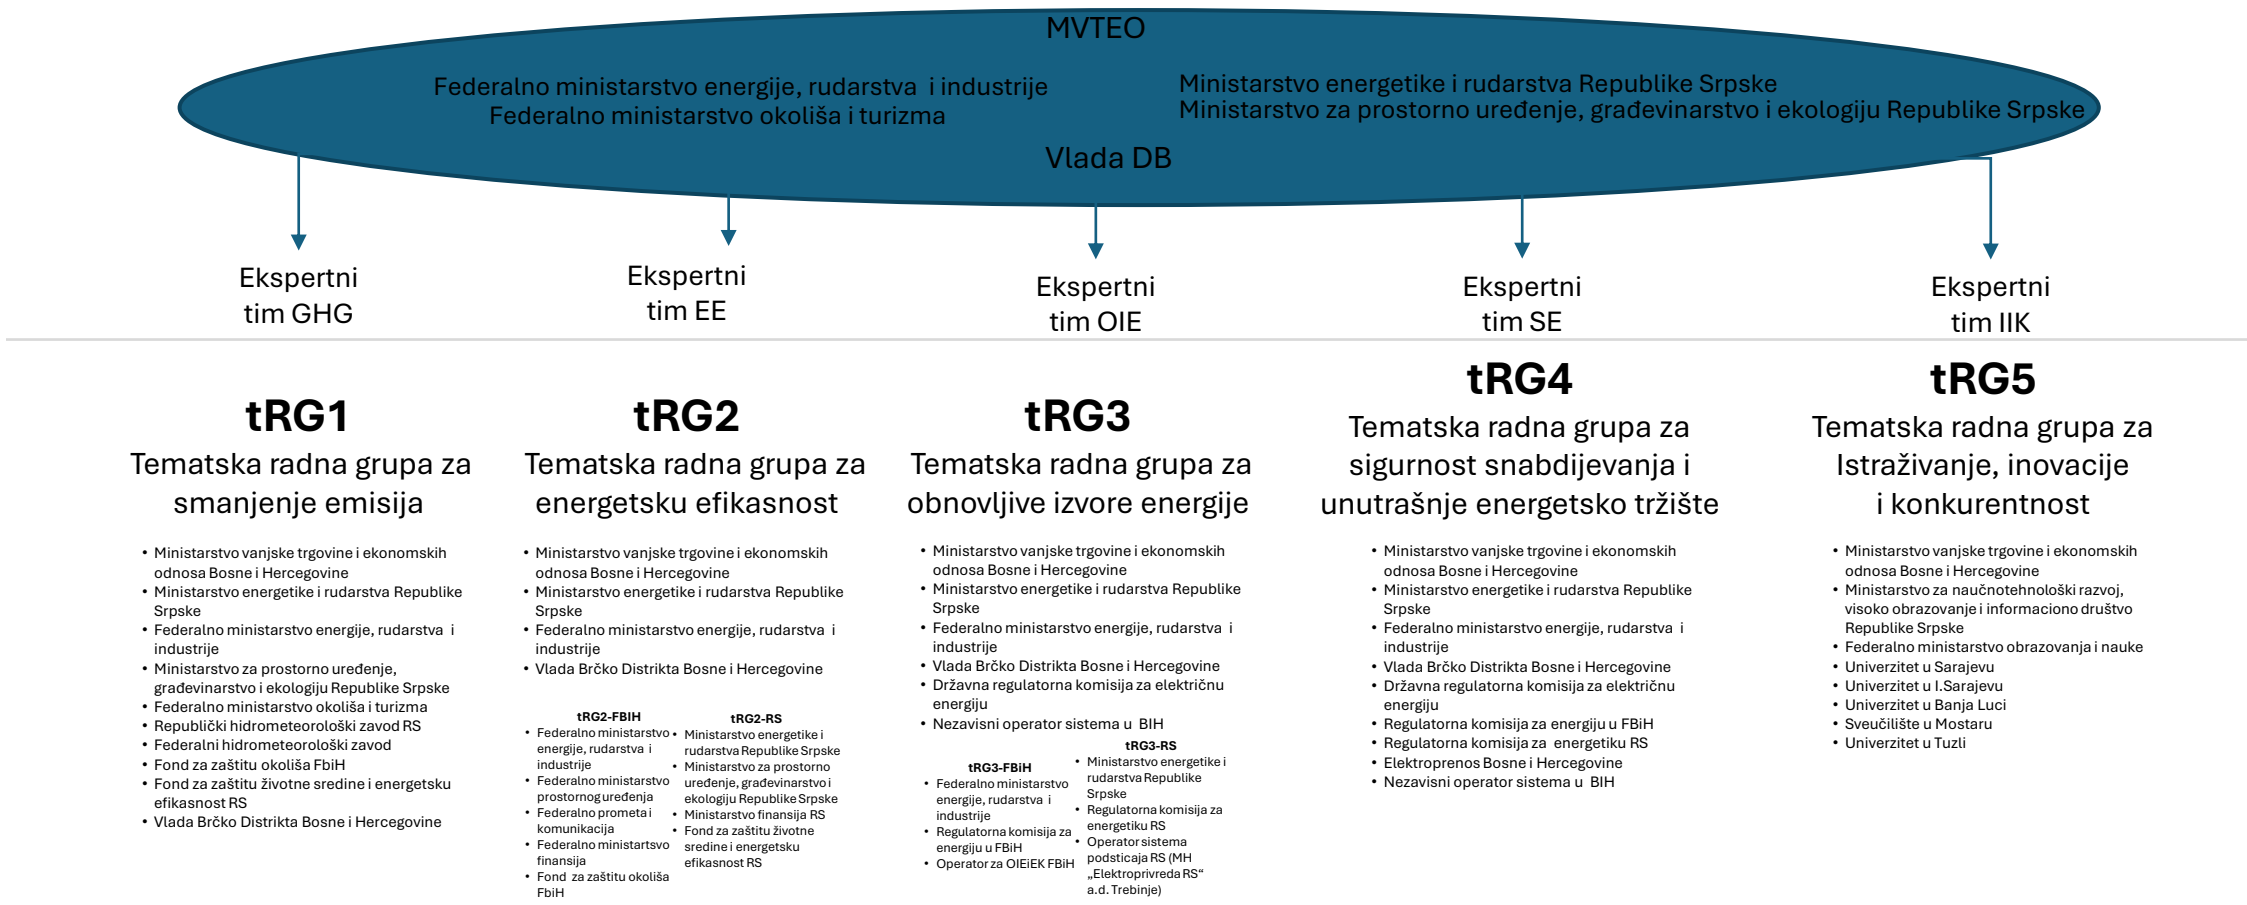

Bosnia and Herzegovina

Reporting successes, challenges, and lessons learned

Sarajevo, 07.09.2025.

Map of the NECP/ECP Processes

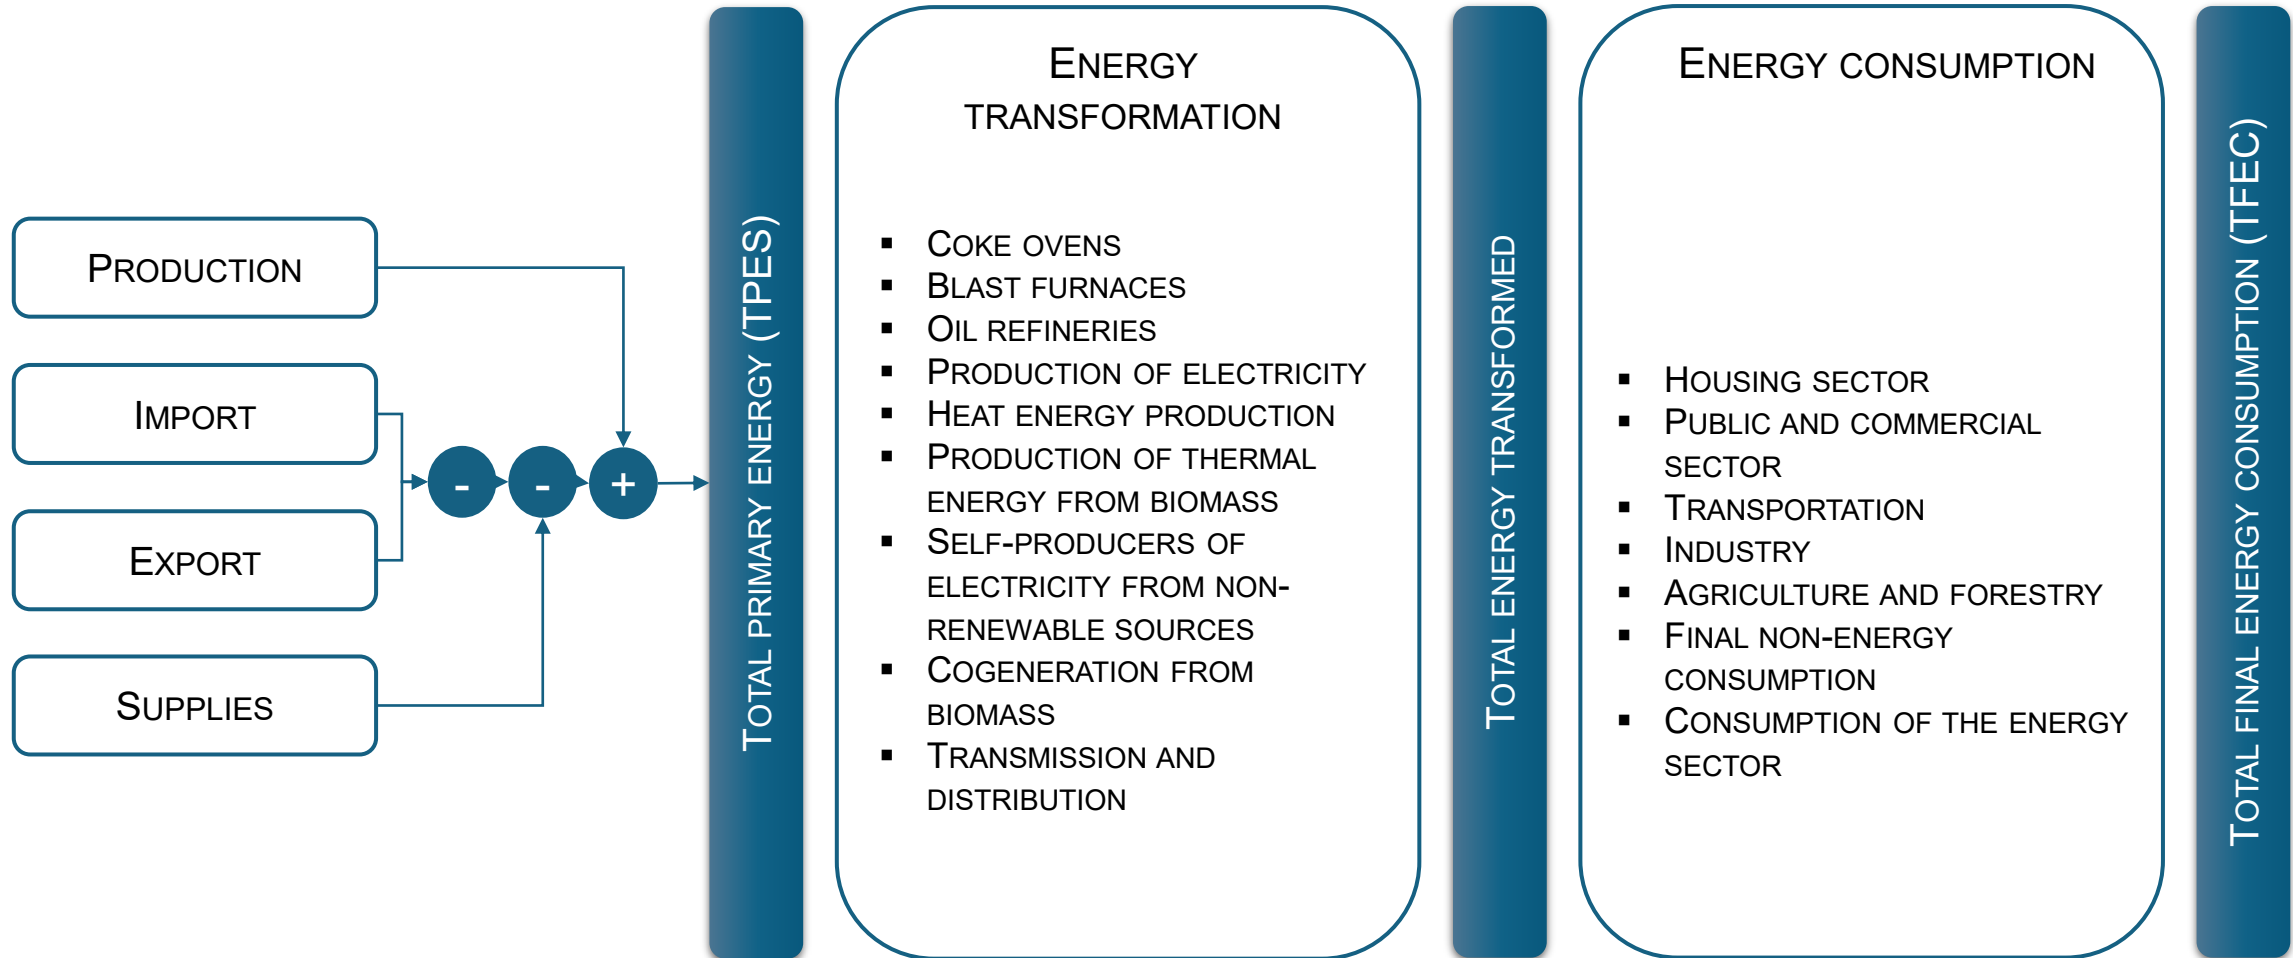

Zajednička tRG

Integrisano planiranje klime i energije u Bosni i Hercegovini - NECP

- Ministarstvo vanjske trgovine i ekonomskih odnosa Bosne i Hercegovine
- Ministarstvo energetike i rudarstva Republike Srpske
- Federalno ministarstvo energije, rudarstva i industrije
- Ministarstvo za prostorno uređenje, građevinarstvo i ekologiju Republike Srpske
- Federalno ministarstvo prostornog uređenja
- Federalno ministarstvo okoliša i turizma
- Ministarstvo civilnih poslova BiH, Sektor za geodeziju, geologiju i meteorologiju
- Ministarstvo finansija i trezora Bosne i Hercegovine
- Ministarstvo finansija RS
- Federalno ministarstvo finansija
- Republički hidrometeorološki zavod RS
- Federalni hidrometeorološki zavod
- Fond za zaštitu okoliša FbiH
- Fond za zaštitu životne sredine i energetske efikasnosti RS
- Agencija za statistiku Bosne i Hercegovine
- Vlada Brčko Distrikta Bosne i Hercegovine
- Federalni zavod za statistiku RS
- Republički zavod za statistiku RS
- Spoljnotrgovinska/Vanjskotrgovinska komora BiH
- Vijeće za državnu pomoć BiH
- Privredna/Gospodarska komora FBiH
- Privredna komora RS
- MH Elektroprivreda RS a.d. Trebinje
- JP Elektroprivreda BiH d.d. Sarajevo
- JP Elektroprivreda HZHB d.d. Mostar
- Državna regulatorna komisija za električnu energiju
- Elektroprivreda Bosne i Hercegovine
- Nezavisni operator sistema u BiH
- Vijeće za državnu pomoć BiH
- Regulatorna komisija za energiju u FBIH
- Regulatorna komisija za energetiku RS
- Operator za OIEIEK FBiH
- Operator sistema podsticaja RS (MH „Elektroprivreda RS“ a.d. Trebinje)
- BH GAS d.o.o. Sarajevo
- Gas promet a.d. Pale
- Gas-Res d.o.o. Banja Luka
- Sarajevo – Gas a.d. Istočno Sarajevo
- Sarajevogas d.o.o. Sarajevo
- Operator – terminali FBiH d.o.o. Sarajevo
- EFT Rudnik i Termoelektrana Stanari d.o.o.
- Razvojni program Ujedinjenih nacija u Bosni i Hercegovini
- GIZ projekat “Promocija obnovljivih izvora energije u Bosni i Hercegovini”
- GIZ projekat “Promocija energetske efikasnosti u Bosni i Hercegovini”
- USAID projekat “Asistencija energetskom sektoru u Bosni i Hercegovini”
- Regulatorna komisija za energiju u FBiH
- Savez opština i gradova RS
- Ministarstvo za naučnotehnološki razvoj, visoko obrazovanje i informaciono društvo Republike Srpske
- Federalno ministarstvo obrazovanja i nauke
- Univerzitet u Sarajevu
- Univerzitet u I.Sarajevu
- Univerzitet u Banja Luci
- Sveučilište u Mostaru
- Univerzitet u Tuzli

ENERGY MODEL

- ✓ 3 Modeling Centers have been established within MOFTER BiH, MER RS, and FMERI.
- ✓ Three LEAP models have been developed: LEAP BiH, LEAP RS, and LEAP FBH.

BINDING TARGETS OF BOSNIA AND HERZEGOVINA FOR THE YEAR 2030

► Bosnia and Herzegovina's targets

Greenhouse Gas (GHG) Emissions	Share of Renewable Energy Sources	Energy Efficiency – Primary Energy Consumption (PEC)	Energy Efficiency – Final Energy Consumption (FEC)
15.65 MtCo2	43.62%	6.84 Mtoe	4.34 Mtoe

► European Comission's targets

Greenhouse Gas (GHG) Emissions	Share of Renewable Energy Sources	Energy Efficiency – Primary Energy Consumption (PEC)	Energy Efficiency – Final Energy Consumption (FEC)
15.65 MtCo2	43.62%	6.50 Mtoe	4.34 Mtoe

A more ambitious target for PEC has been adopted compared to the proposal from BiH!

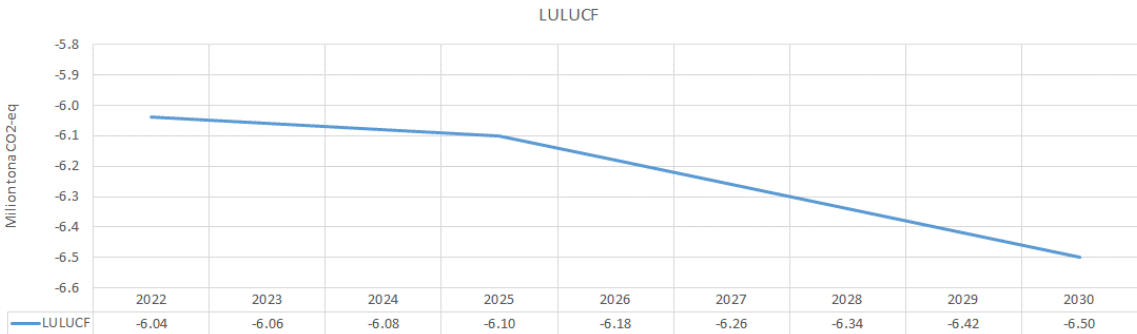

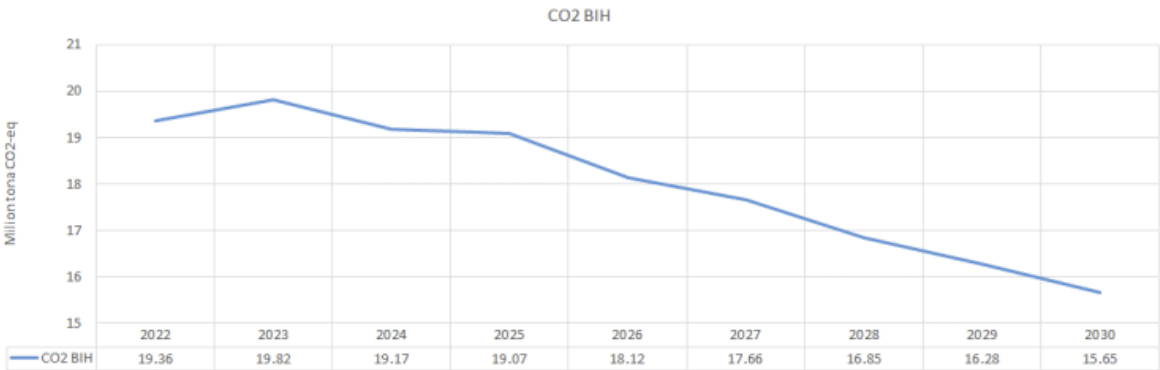

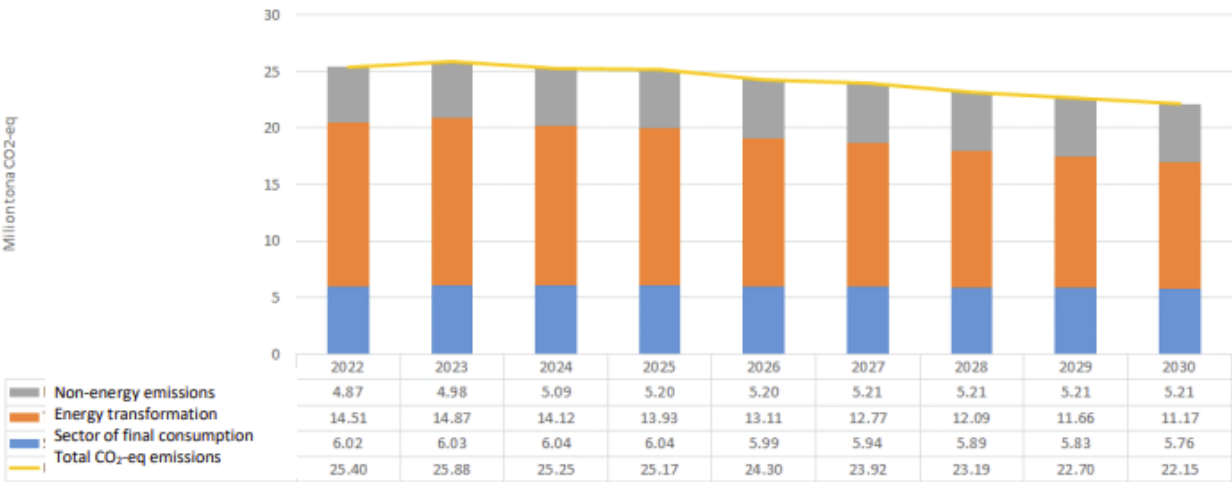

GREENHOUSE GAS (GHG) EMISSIONS — INCLUDING LULUCF*

Total emission of CO₂-eq with **15,6 MtCO₂**
LULUCF in 2030.

Total emission of CO₂-eq **22,18 MtCO₂**
without LULUCF in 2030.

Total emission of CO₂-eq with **26,62 MtCO₂**
LULUCF in 1990.

Emission reduction in 2030
compared to 1990. (with
LULUCF) **41,21%**

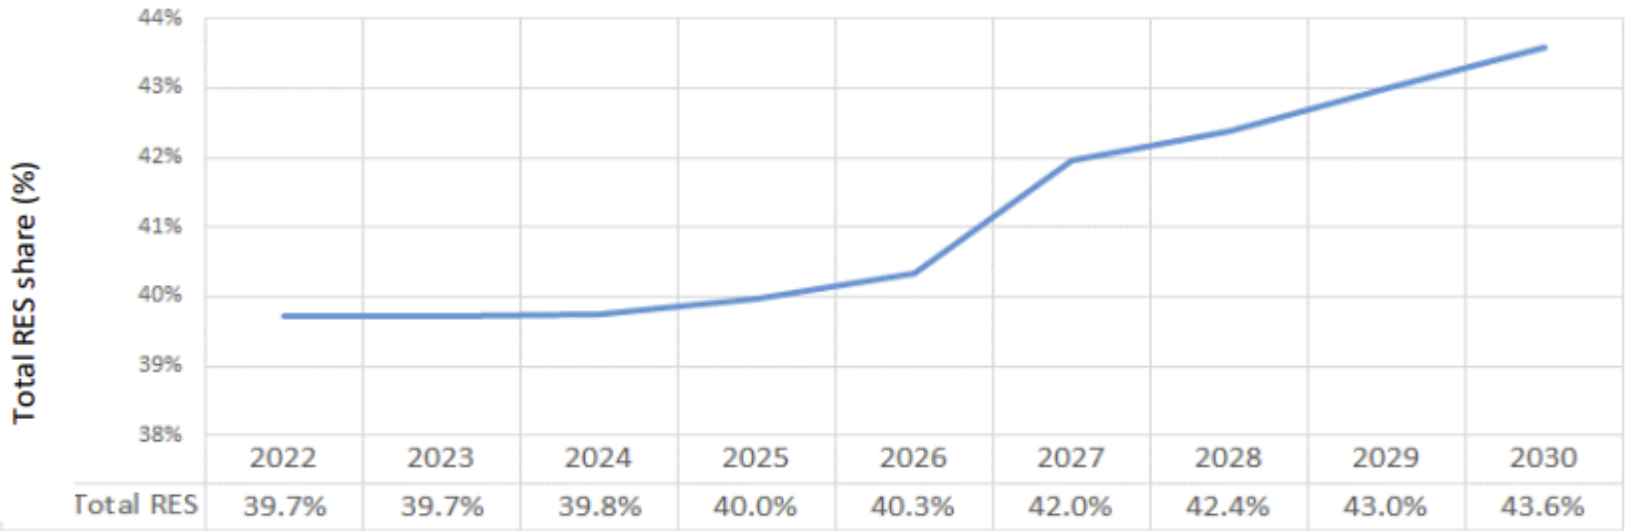

* LULUCF - LAND USE, LAND-USE CHANGE AND FORESTRY

SHARE OF RENEWABLE ENERGY SOURCES (RES)

	2030
RES-H&C	60.8 %
RES-E	70.1 %
RES-T	8.4 %
Total RES	43.6 %

	ktoe	2030
(A) Bruto finalna potrošnja energije iz OiE za grijanje i hlađenje		1.317,71
(B) Bruto finalna potrošnja električne energije iz OiE		900,00
(C) Potrošnja energije iz OiE u transportu		8,03
(D) Bruto finalna potrošnja energije iz OiE		2.225,75

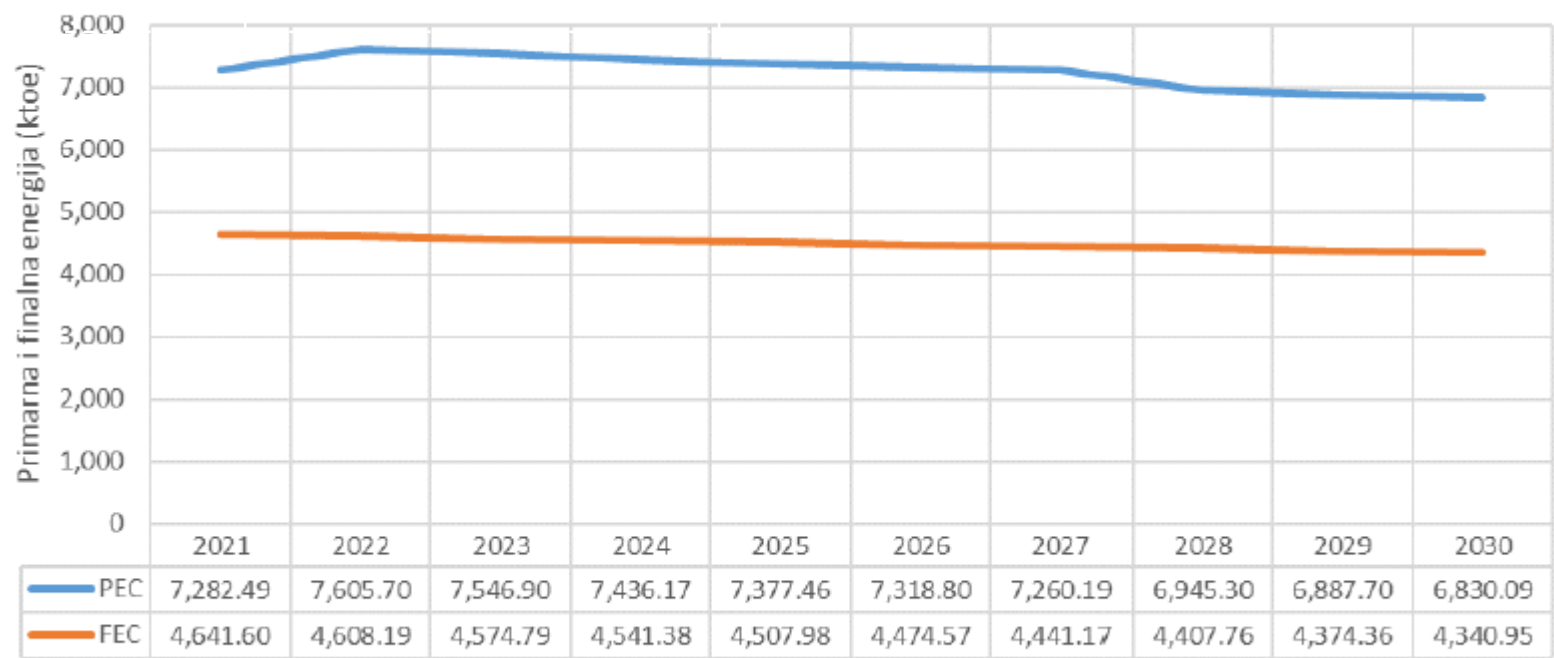

PRIMARY ENERGY CONSUMPTION (PEC) AND FINAL ENERGY CONSUMPTION (FEC)

Primary energy consumption in 2030. **6.830,0 ktoe (6,83 Mtoe)**

Final energy consumption in 2030. **4.341,0 ktoe (4,34 Mtoe)**

Looking at the PEC and FEC values in 2030, the relative ratio of the Baseline and Policy scenarios is:

- ✓ relative reduction of PEC in 2030 is **11.68%**
- ✓ relative FEC reduction in 2030 is **8.53%**

Key policies and measures until 2030

Reducing greenhouse gas emissions

Increasing the share of renewable sources

Increasing energy efficiency measures

Adoption of the necessary legal framework and strategic documents

Establishment of an organized electricity and natural gas market

Establishment of greenhouse gas emissions trading schemes (EU ETS)

Establishment of the Guarantee of Origin system

Implementing a just transition for coal-rich regions

Rationalization of administrative procedures

Increasing the flexibility of systems and infrastructure

Intensifying research and strengthening competitiveness

STATUS OF BIH REPORTING

- Open reporting dataflows for 2023:
 - ✓ National climate change adaptation planning strategies
 - ✓ National GHG PaMs – Annex XXIV
 - ✓ National systems for PaMs and projections – Annex XXIII
- The first deadline for reporting obligations on these three dataflows are from the 15 March, 2023.
- **BH did not report within the deadline.**
- Reason - lack of legislative framework (NECP, MRV system, GHG Inventory)

Role: LEAD REPORTER [2023] Energy Community: National climate change adaptation planning and strategies Pursuant to article 19(1) in the adapted Implementing Regulation 2020/1208, Annex I Legal Instrument: Adapted Governance Regulation for the Energy Community Obligation: Integrated reporting on national adaptation actions Delivery date: 2023-03-15 Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER Energy Community: National GHG PaMs -- Annex XXIV (2023) Contracting Parties shall report their national policies and measures or groups of measures as set out in Annex VI. Legal Instrument: Adapted Governance Regulation for the Energy Community Obligation: Integrated reporting on greenhouse gas policies and measures Delivery date: 2023-03-15 Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER Energy Community: National systems for PaMs and projections - Annex XXIII (2023) Pursuant to Governance Regulation Art. 39 / Implementing Regulation Art.36 of the adapted Governance Regulation. Legal Instrument: Adapted Governance Regulation for the Energy Community Obligation: National systems for policies and measures and projections Delivery date: 2023-03-15 Delivery status: DRAFT Dataflow status: OPEN

STATUS OF BiH REPORTING

- Revenues from Carbon Pricing Mechanism -Annex II (2023; 2024;2025)
- The deadline for reporting on these three dataflows was 31 July 2023; 2024; 2025.
- **BiH did not report within the deadline.**
- The reason is the lack of establishment of an emissions trading system (legislative framework)

Role: LEAD REPORTER  Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2025] Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2025] Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Information on the use of carbon price mechanism revenues - Annex II Delivery date: 2025-07-31 Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER  Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2024] Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2024] Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Information on the use of carbon price mechanism revenues - Annex II Delivery date: 2024-07-31 Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER  Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2023] Energy Community: Revenues from Carbon Pricing Mechanism - Annex II [Exercise 2023] Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Information on the use of carbon price mechanism revenues - Annex II Delivery date: 2023-07-31 Delivery status: DRAFT Dataflow status: OPEN

STATUS OF BiH REPORTING

- New dataflows for reporting opened in 2025:
 - ✓ Approximated greenhouse gas inventories (Reporting 2025)
 - ✓ National systems for policies and measures and projections -Annex XXIII
 - ✓ National climate change adaptation planning and strategies
 - ✓ Additional reporting obligations (EE) AnnexVII
 - ✓ Anex III Decarbonisation – Adaptation data flow (progress towards objectives, targets and contributions)
- The deadline for reporting on these three dataflows was March 15, 2025, **BiH did not report within the deadline.**

Role: LEAD REPORTER	Delivery date: 2025-07-31
 Energy Community: Approximated greenhouse gas inventories - [Reporting 2025] Approximated greenhouse gas inventories - [Reporting 2025]	
Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Approximated greenhouse gas inventories	Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER	Delivery date: 2025-03-15
 [2025] Energy Community: National systems for policies and measures and projections - Annex ... Pursuant to Governance Regulation Art. 39 / Implementing Regulation Art.36 of the adapted Governance Regulation.	
Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: National systems for policies and measures and projections	Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER	Delivery date: 2025-03-15
 [2025] Energy Community: National climate change adaptation planning and strategies Contracting Parties shall report on their national climate change adaptation planning and strategies, outlining their implemented and planned actions to facilitate adaptation to climate change	
Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Integrated reporting on national adaptation actions	Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER	Delivery date: 2025-03-15
 [2025] Energy Community: Additional reporting obligations (EE) - Annex XVII CPs shall include in the integrated national energy and climate progress reports information: (c) as set out in Part 2 of Annex IX (for the exhaustive list of additional reporting obligations in the area of renewable energy refer to the annex).	
Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Additional reporting obligations in the area of energy efficiency	Delivery status: DRAFT Dataflow status: OPEN
Role: LEAD REPORTER	Delivery date: 2025-03-15
 [2025] Energy Community: Annex III Decarbonisation - Adaptation dataflow Progress towards objectives, targets and contributions (Decarbonisation: adaptation)	
Legal instrument: Adapted Governance Regulation for the Energy Community Obligation: Progress towards objectives, targets and contributions (Decarbonisation: adaptation)	Delivery status: DRAFT Dataflow status: OPEN

STATUS OF BiH REPORTING

- Bosnia and Herzegovina also has positive experiences of reporting on the Repornet 2 platform.
- Since 2018, BiH has been reporting total emissions of SO2, NOx and dust from large combustion plants (LCP) in Bosnia and Herzegovina.
- Legislative framework: National Emission Reduction Plan of Bosnia and Herzegovina (NERP BH).
- **BiH has an established reporting system for NERP BiH.**

GUIDE FOR NECP REPORTING

- A **Guide to Integrated Energy and Climate Reporting** in Bosnia and Herzegovina: Concept and Recommendations prepared
- **Recommended guidelines for transposition of Gov Regulation** (with the role of the entities and the BD BiH) prepared:
 - ✓ Establishment of a horizontal institutional mechanism
 - ✓ Clearly define the responsibilities of the state level, entities and the BD BiH.
 - ✓ Develop guides and tools for data exchange.
 - ✓ Coordinate equal participation of all levels in the planning and reporting processes
 - ✓ Ensure capacities and resources for the work of the competent bodies and appointed contact points.
 - ✓ Monitoring progress through joint evaluations and reports
 - ✓ Harmonization of operational systems and methodologies, reporting formats and frequencies.
 - ✓ Methodologically harmonized energy balances, GHG inventories and analytical bases
 - ✓ Standardization of the methods of conducting analyses (especially for FBiH, RS and BD BiH)

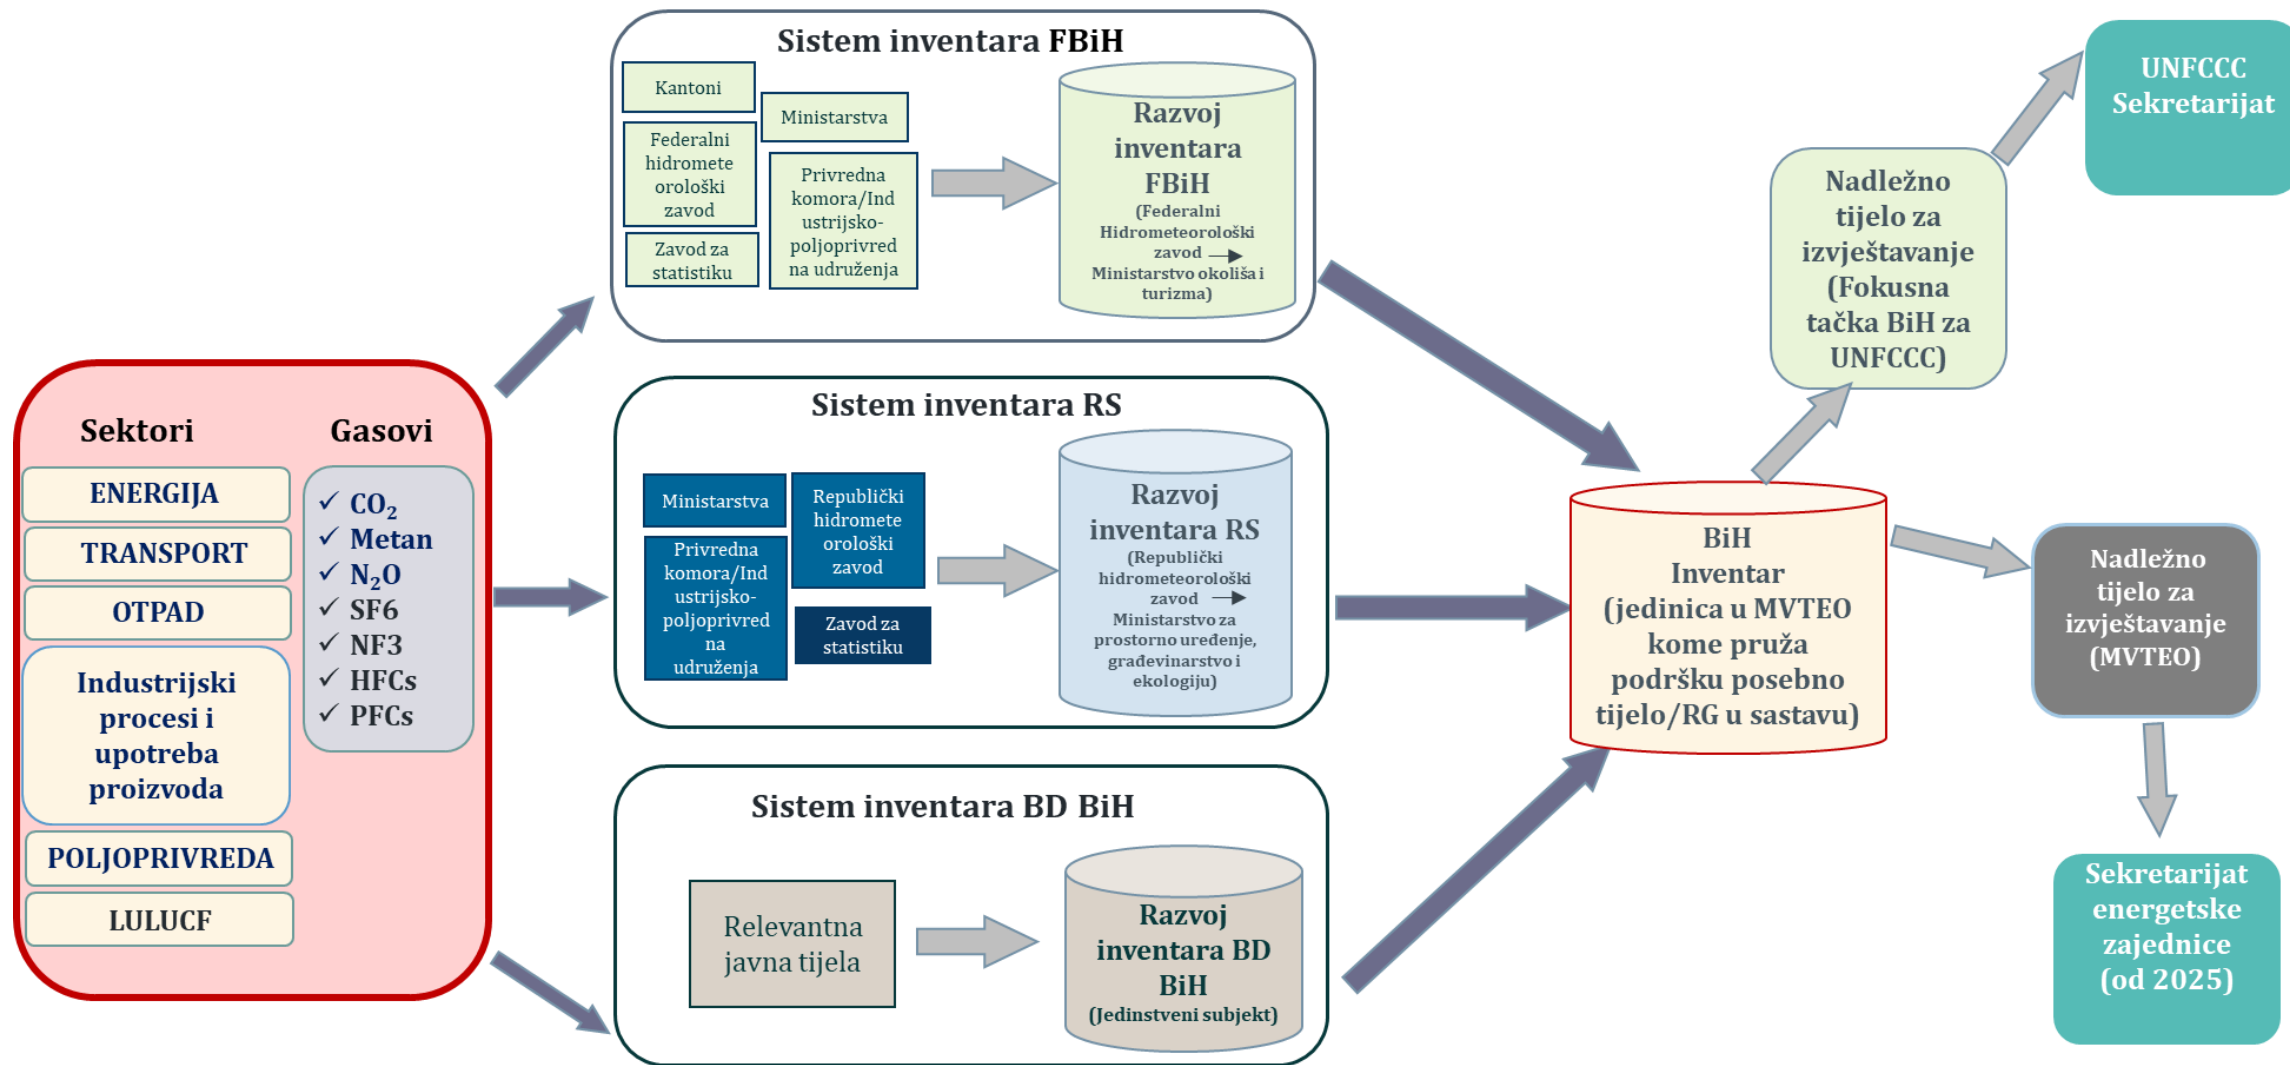

PROPOSAL FOR THE STRUCTURE OF THE INTEGRATED ENERGY AND CLIMATE SYSTEM (MRV)

- **Bosnia and Herzegovina must establish a NECP MRV system** that covers all requirements of the Regulation on Governance, not just the NECP
- The system should include:
 - ✓ MRV units in the entities and the BD BiH,
 - ✓ an integrated database at the BiH level and coordination,
 - ✓ clearly defined responsibilities for reporting
 - ✓ regulations prescribing formats, deadlines and procedures (with harmonised forms),
 - ✓ digital solutions for data exchange and verification,
 - ✓ permanent coordination bodies for cross-sectoral and inter-institutional cooperation.
 - ✓ The system must be aligned with EU standards and enable transparent monitoring of targets in all areas – from emissions and RES to innovation and financing.

PROPOSAL FOR THE STRUCTURE OF THE INTEGRATED ENERGY AND CLIMATE SYSTEM (MRV)

PROPOSAL FOR THE SYSTEM FOR COLLECTING AND REPORTING DATA ON GHG EMISSIONS AND REMOVALS

CHALLENGES AND RECOMMENDED SOLUTIONS

Challenges:

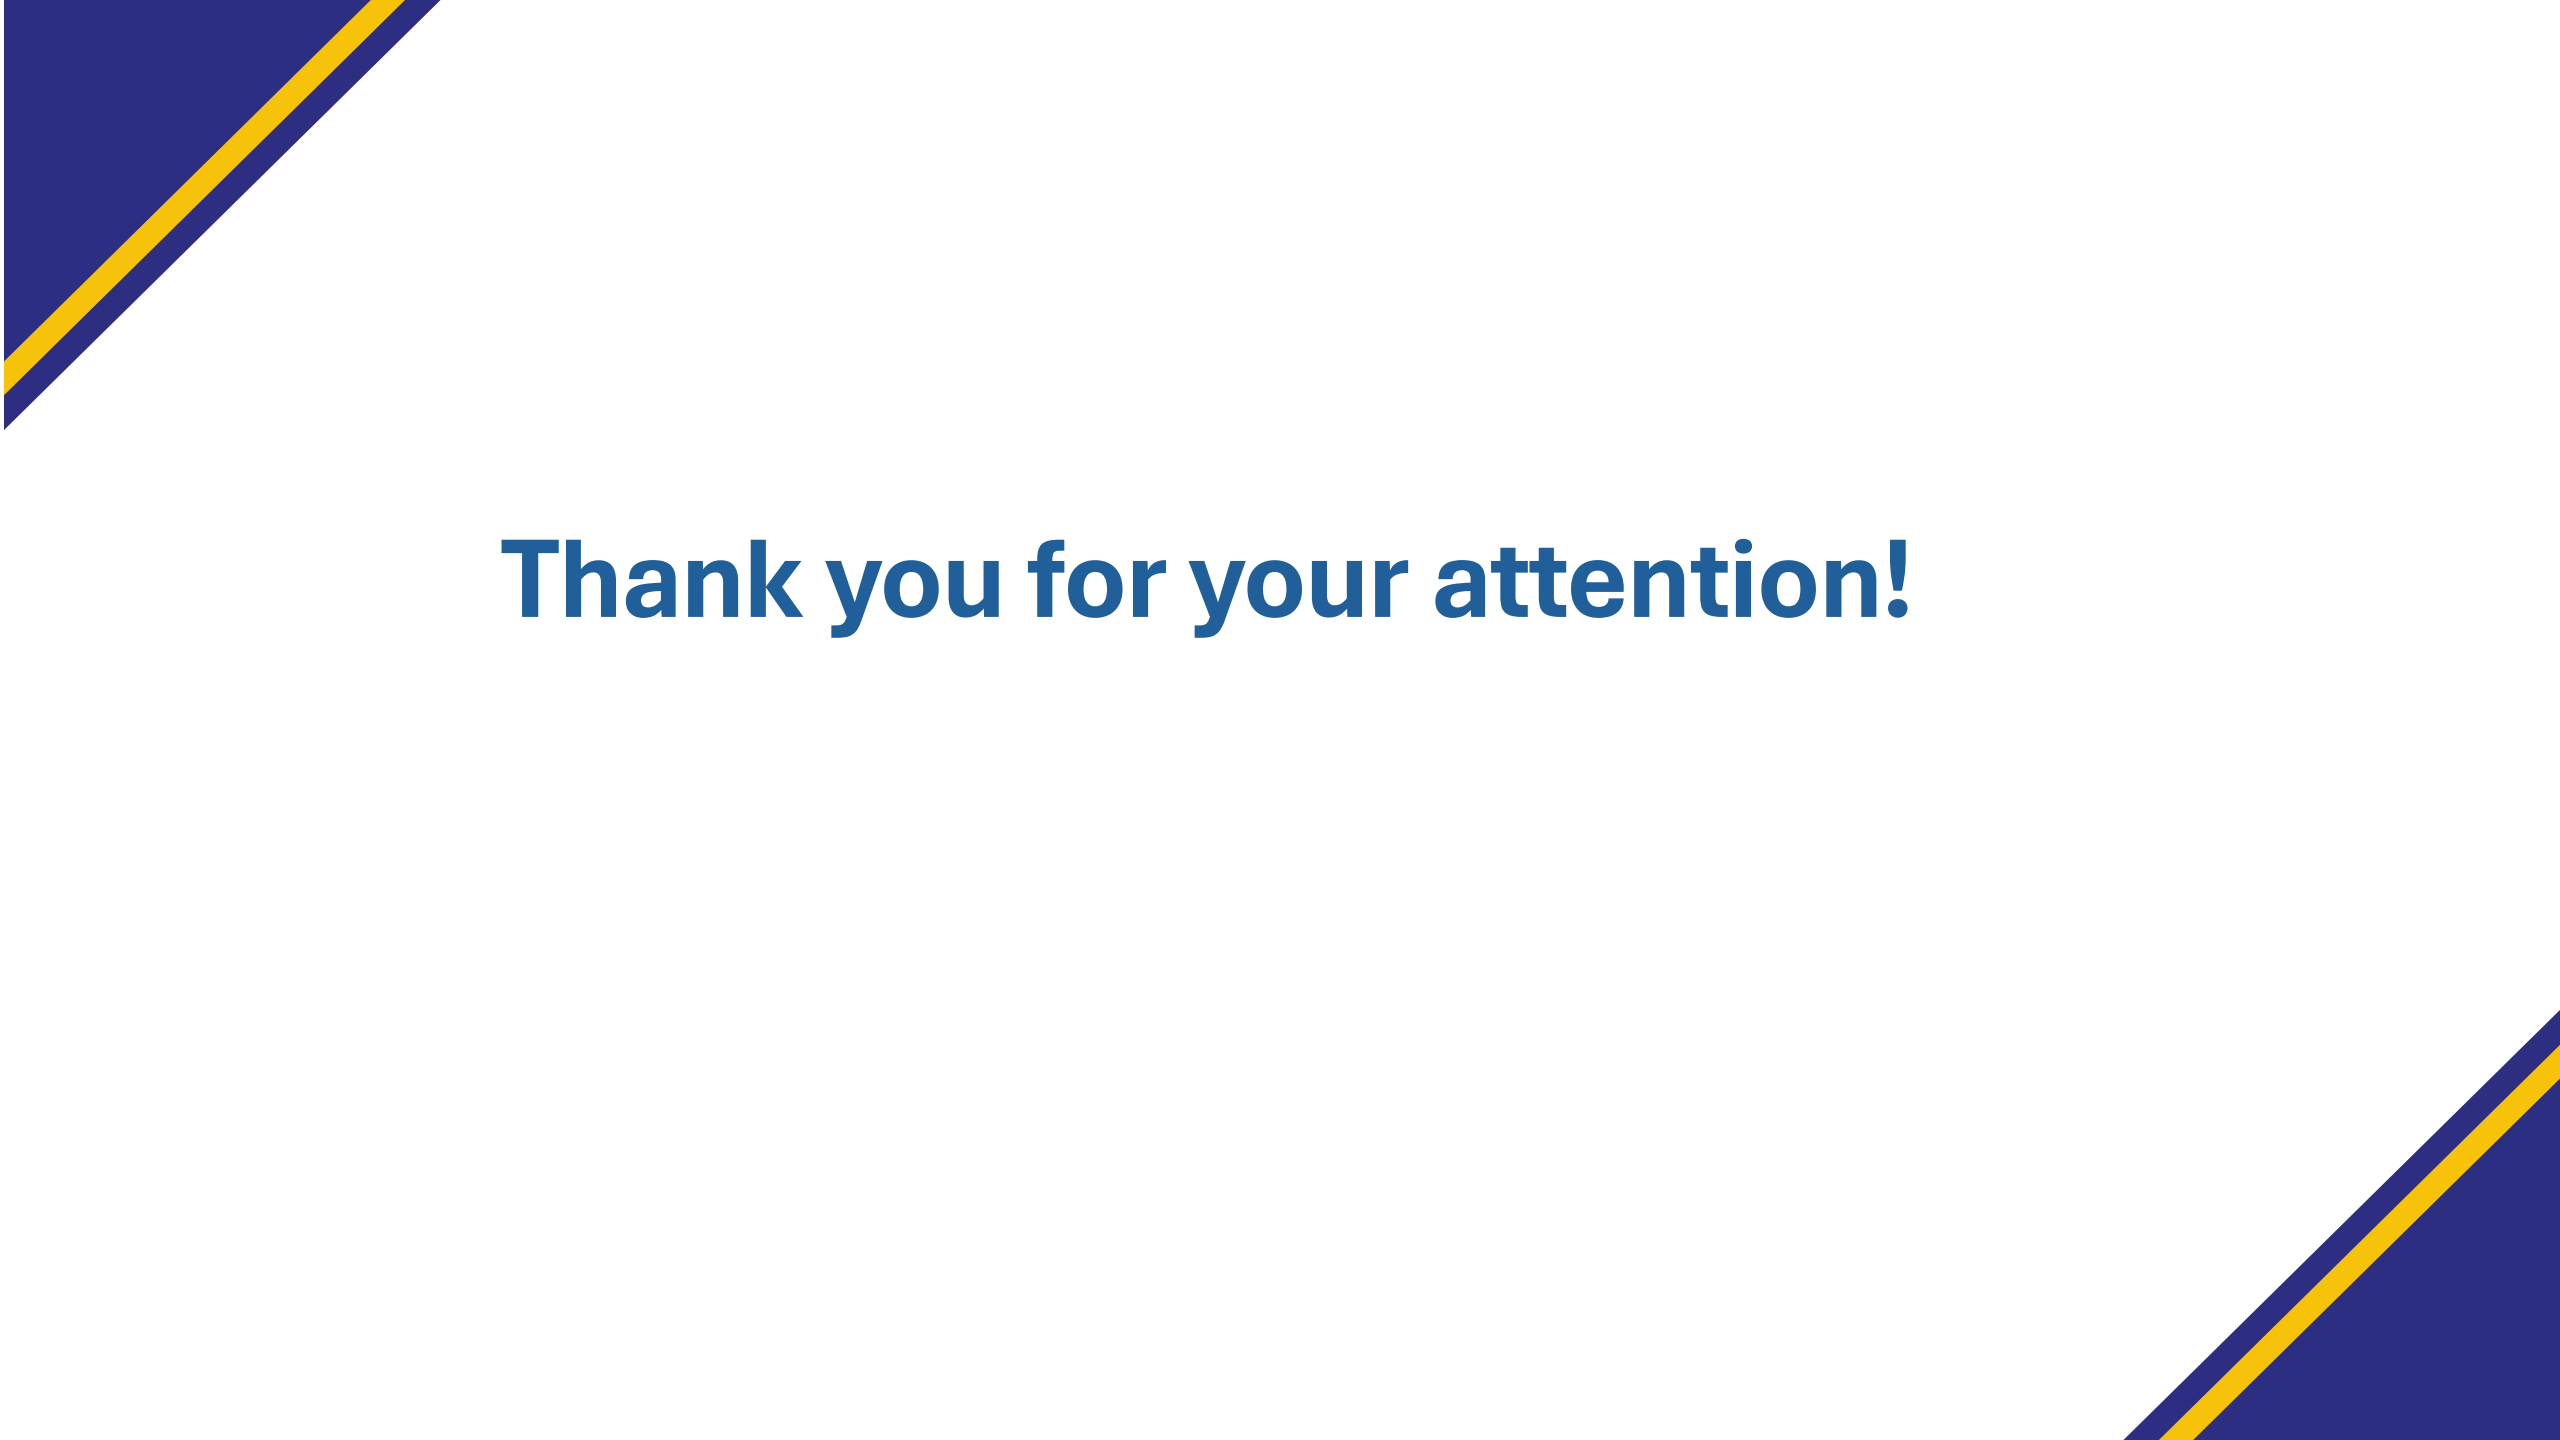

- No clear guideline for transposition of Gov Regulation
- Fragmented system and inconsistent data sources (energy balances, GHG inventories, EMIS, ODYSSEE-MURE ...)
- Energy balances (pre filed data) and GHG inventories are not available for n-1 or n-2
- Lack of a unified MRV system and Lack of a clear system of data collection, aggregation and estimation
- Limited institutional capacities and coordination.

Recommended Solutions:

- Establish the NECP MRV platform as a central tool.
- Sign data-sharing agreements between institutions.
- Develop automated formats for EEA dataflows.
- Strengthen capacities and provide training in relevant institutions.
- Establish a permanent coordination mechanism for quality monitoring.

PRIORITIES OF BOSNIA AND HERZEGOVINA AND NEXT STEPS

- Adoption of the final draft of the NECP and its implementation
- Preparation of the Report on the Progress and Implementation of the NECP
- Establishment MRV system (NECP, NDC, ETS, SLCPs...)
- **Roadmap for the Implementation of the Reporting System (NECP MRV / EEA):**
 - ✓ **Phase 1 – Preparation** -Identify data sources and flows; Establish a coordination body and define responsibilities.
 - ✓ **Phase 2 – Design and Development** - Develop technical architecture and the central database; Pilot data exchange between institutions.
 - ✓ **Phase 3 – Implementation and Training** - Operational launch of the NECP MRV system; Conduct training and test reporting according to EEA requirements.
 - ✓ **Phase 4 – Full Functionality** - Automated reporting to EEA Dataflows; Annual reviews and continuous improvement of data quality.

Thank you for your attention!
