Reporting element	Specification	☒	Unit	Indicator	
Definition of the 2030 savings contribution ⁽¹⁾	M		n/a		
Description of the 2030 contribution and indicative trajectory from 2021-2030	M		n/a		
Value of the savings contribution 2030	M		ktoe		
Translation into absolute level of PEC	M		ktoe		
Translation into absolute level of FEC	M		ktoe		
				2022 ⁽⁴⁾	2023
Progress towards indicative trajectory 2021-2030 in PEC ⁽²⁾	M	☒ ☐ ☐	ktoe		
Progress towards indicative trajectory 2021-2030 in FEC ⁽²⁾	M	☒ ☐ ☐	ktoe		
Baseline GDP level, if the contribution is set as an intensity target	Miap		Million-euro, chain-linked volumes ⁽³⁾		
General comments on the national contribution and indicative trajectory for primary and final energy consumption ⁽⁵⁾	V				

Notation: X = reporting year; M = mandatory; Miap = mandatory if applicable; V = voluntary

Notes:

⁽¹⁾ Member States shall select from the following options: primary energy consumption; final energy consumption; primary energy savings; final energy savings; energy intensity.

⁽²⁾ PEC and FEC according to the Eurostat indicators of the complete energy balances [nrg_bal_c] - Primary and Final energy consumption (Europe 2020-2030). Please see the PEC and FEC definitions (as the monitoring indicators for the Directive on energy efficiency) in the most recent version of the Energy balance guide on the website of Eurostat (see chapter "Complementing indicators").

PROGRESS TOWARDS INDICATIVE TRAJECTORY 2021-2030 IN PEC (2)

2022

2023

2022

Tipo Dato: **Pre-filling**. Information that is already provided by the MS to the Commission through another reporting exercise, that finishes substantially before the deadline for the progress report. Information will be prefilled in the relevant template. **Data will be checked and commented by the Member States, where necessary.** Data shall not be altered in the progress reporting, but through the primary process established for the source data (example: Eurostat energy statistics).

Specification: M
