

Agenda for in-person training on reporting obligations for the adapted Governance Regulation

Date: 7-9 October 2025

Place: Hotel Europa, Sarajevo, Bosnia and Herzegovina

Modality: In person

To support the Contracting Parties (CPs) of the Energy Community fulfill their reporting obligations under the adapted Governance Regulation, the European Environment Agency (EEA) is offering technical support through the “Supporting Energy and Climate Monitoring by the Energy Community” Project. This support is tailored to the specific needs and progress of each CP in their reporting journey. The agenda below outlines the planned in-person training for Bosnia and Herzegovina’s reporting team, which is scheduled for **7-9 October 2025**. In addition to the Ministry of Foreign Trade and Economic Relations of Bosnia and Herzegovina, all relevant entity-level institutions responsible for energy and environment, as well as the Government of Brčko District, will be invited to the workshop. The training is expected to bring together between 20 and 30 participants from Bosnia and Herzegovina.

The purpose of this training is to help reporters become familiar with the reporting legislation, understand the necessary data requirements, and effectively use the reporting tool Reportnet 3.

To achieve this goal:

- There will be a presentation outlining the reporting obligations and demonstrating how they are addressed within Reportnet.
- Whenever possible, real data will be incorporated into the training, allowing participants to make tangible progress in fulfilling their reporting obligations.
- Interactive exercises will give EEA staff insight into the challenges reporters face, enabling the group to identify obstacles and work together on solutions.

To encourage effective collaboration with other climate transparency initiatives, the EEA team may invite colleagues from related projects, such as those funded by UNDP or GIZ, to join the meeting. This will help ensure coordination and maximize shared expertise across different funding streams.

Target participants: Lead and supporting reporters nominated for the following reporting obligations:

- **GHG Inventories**
- **Approximated GHG Inventories**
- **NECP IPR:** Integrated PaMs
- **NECP IPR:** Progress to Targets GHG Emissions
- **NECP IPR:** Progress to Targets Renewable Energy Systems
- **NECP IPR:** Progress to Targets Energy Efficiency
- **NECP IPR:** Progress to Targets **Adaptation**
- **NECP IPR:** Additional Reporting Obligations RES
- **NECP IPR:** Additional Reporting Obligations EE

- GHG Projections
- National Systems for PaMs and Projections
- **Climate Adaptation:** National climate change adaptation planning and strategies

Important note for participants:

- The training language will be English.
- Participants are required to **bring their work laptops**.
- Lead and supporting reporters for the adapted GovReg must have access to Reportnet2 and Reportnet3 and have set up Multi-Factor Authentication (MFA). Please refer to the guide for assistance: <https://www.eionet.europa.eu/reportnet/docs/prod/mfa-for-eu-login.pdf>
- Breakout session preparations: The EEA requests Contracting Party representatives to bring the following:
 - **GHG Inventory dataflows:** Please bring relevant activity data for hands-on exercises. These exercises will focus on Annexes and Approximated Inventories, and having national data on hand will ensure a more practical and meaningful session.
 - **Integrated Policies and Measures (PaMs) dataflows:** Please bring examples of several policies and measures. Information from NECPs is a useful source. These examples will help when completing reporting obligations and addressing related questions.
 - **The six 'Progress to Targets' dataflows:** Reporters may bring their own data if available or use sample data for experimentation.

We look forward to seeing you in Sarajevo.

Warm regards,

The Energy Community team at the EEA and the Energy Community Secretariat

Day 1 – General introduction on the adapted GovReg and the reporting obligations, and focus on Integrated Policies and Measures and the GHG Inventories.

Overview of the 2025 reporting process	
08:45-09:00	Registration and arrival
09:00-09:15	Opening remarks by the hosts and the Energy Community Secretariat
09:15-09:30	Overview of the agenda and workshop objectives by EEA
09:30-10:00	Introduction – who is who?
10:00-10:30	2025 Reporting roadmap – Current progress, overall quality reports, and future directions The EEA outlines overall progress regarding 2025 reporting obligations and provides an overview of the aggregated quality results. In addition, the presentation also becomes forward-looking, describing what is to come.
10:30-10:50	Coffee break – picture time
10:50-11:30	Bosnia and Herzegovina – reporting successes, challenges, and lessons learned Bosnia and Herzegovina will describe the process to report under the adapted Governance Regulation and highlight success and challenges.
11:30-12:00	Session on EU4ENERGY and UNDP projects Representatives from EU4ENERGY and UNDP will present on their projects with the aim of identifying potential synergies between their projects and EEA's support under the adapted Governance Regulation.
12:00-12:45	Lunch

Group split: Focus on GHG Inventory and Integrated Policies and Measures

Participants will be divided into two groups, with one focusing on GHG Inventory and the other on Integrated Policies and Measures.

12:45-13:30

NECP IPR reporting
Guidance on reporting 'Integrated Policies and Measures (PaMs)'

The EEA will provide an overview of the reporting obligations for Integrated Policies and Measures (PaMs) and highlight common areas where information is often incomplete or missing based on the quality review of the submitted PaMs.

Bosnia and Herzegovina will present (15 min) on their PaMs within their NECP, and their systems for PaMs reporting

12:45-13:15

GHG Inventories
Guidance on reporting 'GHG Inventories'

Virtual presentation – Louise Attard

The EEA will present the reporting requirements under the adapted Governance Regulation, along with additional obligations introduced by the updated Governance Regulation.

GHG Inventories

13:15-14:00

Real-life experience: Insights from Croatia and Serbia

Virtual presentations – Tatjana Obučina and Ivana Dukić

Tatjana Obučina and Ivana Dukić from Croatia and Serbia, respectively, will share their experience with reporting, inter-institutional coordination, and capacity building needed to meet the reporting requirements on GHG Inventories.

13:30-14:30

NECP IPR reporting
Real-life experience: Insights from Estonia

Virtual presentation – Cris-Tiina Pärn

Cris-Tiina Pärn from Estonia will share their experience with reporting, inter-institutional coordination, and capacity building needed to meet the reporting requirements on Integrated PaMs and Projections.

NECP IPR reporting
How to Report?

The EEA will guide participants through the process of reporting on PaMs using Reportnet.

Cont'd after the break.

GHG Inventories

14:00-14:30

A presentation on the state of play on the GHG Inventory in Bosnia and Herzegovina.

14:30-14:45

Coffee break

14:45-15:45 NECP IPR reporting How to Report? The EEA will guide participants through the process of reporting on PaMs using Reportnet. All participants should have gained access to Reportnet during the prior virtual session and should be able to follow along and complete practical exercises on their laptops. The EEA will also provide an exercise for each participant to complete, filling in one or more PaMs. EEA staff will be available to answer questions and offer guidance throughout the session.	14:45 – 16:30 GHG Inventories GHG Inventories – what needs to be reported? CITEPA will provide a presentation covering in general the National Inventory Reporting. • National Inventory Document (NID) • Common Reporting Tables (CRT)
15:45-16:00 NECP IPR reporting Q&A on Integrated PaMs Participants will have the opportunity to ask questions, and the EEA will address the most common queries. There will also be a (voluntary) quiz.	
16:00-16:30 National Systems for PaMs and Projections The EEA will give an overview of the reporting obligation on national systems, guiding participants through each step of the process.	

Day 2 – Climate Adaptation, GHG Approximated Inventories, GHG Projections, and progress to targets reporting obligations on Adaptation and Energy Efficiency

Group split: Focus on Climate Adaptation, GHG Projections, Energy Efficiency, and Approximated Inventories Participants will be divided into two groups, with one focusing on Climate Adaptation and Energy Efficiency, the other on Approximated Inventories and GHG Projections.	
08:45-09:00	Registration and arrival
09:00-10:30 Climate Adaptation Guidance on reporting on ‘ Adaptation planning and strategies (Art 19) ’ and Progress to Target Decarbonisation: Adaptation (Art 17) The EEA will give an overview of the two adaptation reporting obligations, guiding participants through each step of the process. Participants will work together to identify potential information gaps and sources, while also receiving hands-on training on reporting procedures. Bosnia and Herzegovina will present (20 min) their adaptation policies and an overview of adaptation goals in the NECP or other policy documents.	09:00-09:45 GHG Annexes Presentation on Annexes of the Implementing Regulation (Annex by Annex), data reporting, and guidelines and discussion. CITEPA will provide a presentation covering the Annexes, the data to be reported and guidelines. Discussion on data availability and filling in the Annexes A discussion will focus on data availability in Bosnia and Herzegovina and the process for completing the Annexes. The list of required activity data on Annexes will be shared with Bosnia and Herzegovina in advance to help them prepare for the workshop.
	09:45-10:30 GHG Approximated Inventories Obligations in terms of proxy: Context and use An overview of the obligations related to proxies, including their context and application. Presentation of sectoral methodologies An example of sectoral methodologies used in France to compile the proxy will be presented, illustrating the approach and techniques applied. Discussion on data availability A roundtable discussion will be held to assess data availability. The list of required activity data on Approximated Inventory will be shared with the Contracting Party in advance to help them prepare for the workshop.
10:30-10:45	Coffee break

10:45-12:00 Climate Adaptation Continuation on guidance on reporting on 'Adaptation planning and strategies (Art 19)' and Progress to Target Decarbonisation: Adaptation (Art 17)	10:45-12:00 GHG Approximated Inventories Hands-on exercises on proxy compilation Participants will engage in hands-on exercises to practice compiling proxies, applying the methodologies discussed.
12:00-13:00	Lunch
13:00-14:00 NECP IPR reporting Guidance on reporting 'Energy Efficiency' The EEA will provide an overview of the reporting obligations for Renewable Energy and highlight common areas where information is often incomplete or missing.	GHG Projections 13:00-14:00 Bosnia and Herzegovina will present (15 min) their GHG projections in the NECP and how these were created. The EEA will present the reporting obligations related to 'Projections', explaining the requirements and highlighting common areas where information is often lacking. The presentation will also include the template used for reporting.
14:00-14:30 NECP IPR reporting Real-life experience: Insights from Spain <i>Virtual presentation – Sofia Rodriguez Pita</i> Sofia Rodríguez Pita will share their experience with MS reporting on energy efficiency, with a focus on Annex 16.	
14:30-14:45	Coffee break
14:45-16:00 NECP IPR reporting How to report? The EEA will guide participants through the process of reporting on Energy Efficiency obligations using Reportnet. An exercise will be provided for each participant to report on these obligations. EEA staff will be available to answer questions and provide guidance throughout the session.	GHG Projections 14:45-16:00 How to report on Projections? The EEA will guide participants through the process of reporting on Projections obligations using Reportnet. An exercise will be provided for each participant to report on these obligations. EEA staff will be available to answer questions and provide guidance throughout the session.

Day 3 – Progress to targets reporting obligations on Renewable Energy and GHG Emissions

Group split: Focus on Renewable Energy and Progress to GHG Emission Targets Participants will be divided into thematic groups focusing on Renewable Energy and Progress to GHG Emission Targets.	
08:45-09:00	Registration and arrival
09:00-10:30 NECP IPR reporting Guidance on reporting ‘Progress to Target GHG Emissions’ The EEA will provide an overview of the reporting obligations for GHG Emissions Progress to Target and highlight common areas where information is often incomplete or missing. How to report? The EEA will guide participants through the process of reporting on Progress to Target GHG Emissions obligations using Reportnet. An exercise will be provided for practice. EEA staff will be available to answer questions and provide guidance throughout the session.	09:00-10:00 NECP IPR reporting Guidance on reporting ‘Renewable Energy’ The EEA will provide an overview of the reporting obligations for Renewable Energy and highlight common areas where information is often incomplete or missing.
	10:00-10:30 NECP IPR reporting Real-life experience: Insights from an EU Member State VITO will share insights into the experience with MS data reporting needed to meet the reporting requirements on Renewable Energy.
10:30-10:45	Coffee break
10:45-11:30 “Open office” – support on any of the reporting obligations EEA staff will be available to answer questions on any of the reporting obligations dealt with under the training.	10:45-12:00 NECP IPR reporting How to report? The EEA will guide participants through the process of reporting on Renewable Energy obligations using Reportnet. An exercise will be provided for practice. EEA staff will be available to answer questions and provide guidance throughout the session.
12:00-12:30 Everyone Conclusion of the workshop The EEA and the EnCS will provide concluding remarks for the workshop and the reporting to come.	
12:30-13:30	Lunch
